

YOUR PTA DOLLARS AT WORK!

It is with much excitement that the PTA would like to announce the opening of the newly improved computer lab! **Because of a huge team effort, and your donations of time and money, the PTA was able to purchase 36 new computers** for the student computer lab! Because of this improvement, it makes Wildwood one of the first elementary schools in the Conejo Valley to have a technologically up to date computer lab. Our students will have so many exciting educational advantages with these new computers. This was all made possible by the wonderful families, teachers, and staffs' dedication and commitment to make Wildwood an even better place for our children to attend school. We are so proud of this accomplishment and want you to know that we cannot do wonderful things like this without your support! This is a team effort, so a **huge Thank You goes out to all!**
